

Normal case: flats must be shifted left a little, but not the last one:

a      bbbbbb i   i                      i                      g

Breaking line after each bar with a big value of `alterationadjustmentbar`, to check that it doesn't interfere with spacing at the beginning of a line:

a      bbbbbb

i                                              i

i                      g
