

Test: NABC visibility with `phantom`/`hphantom` wrappers.

Goal: ensure NABC remains visible when notes/lines use `hphantom` or `disabled`.

Example 1: full reference with all elements visible (notes, staff lines, clef, lyrics, above-lines text, translation, and NABC).

Omnes

A  l-le- lú-ia.

Example 2: NABC visible while notes/lines/clef are hidden with `hphantom`.

Omnes

A  l-le- lú-ia.

Example 3: NABC line visibility with notes/lines/clef `disabled` (no `hphantom`).

Omnes

A  l-lelúia.

Example 4: NABC disabled with notes/lines/clef hidden by hphantom.

A Omnes
l-le- lú-ia.

Example 5: exercise new visibility values (`phantom/vphantom`) for notes, lines, clef, lyrics, above-lines text, translation, and NABC. No rendered output is expected, but the document should still compile successfully.
