

Basic inline snippet, staff lines trimmed to music width

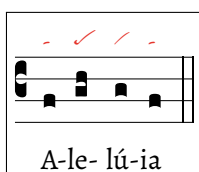

Behold the incipit A le lu ia of the day, set right in the middle of this sentence, with its staff lines running only as wide as the music itself, not the full text width.

Same snippet inside an \fbox

The box below should hug the music tightly, with no blank staff extending past the final bar:

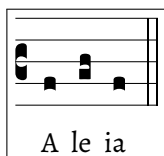

Extra gabc header: nabc-lines:1;

With ancient notation above the staff:

Extra gabc header: staff-lines:5;

With a five-line staff:

Forced line break (Z) inside a snippet

Only the first line should be kept, and a warning issued to the log; the snippet must not overflow past its first staff:

\gresetinlinesnippetraise

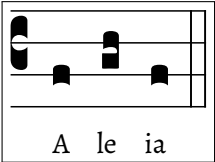

Baseline A le ia raised 4pt A le ia lowered 4pt A le ia back to baseline.

`\gresetinline snippetshook`

Normal size

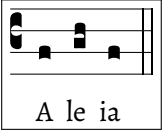

and, with the hook rescaling the staff for the snippet only,

back to nor-

mal size

(the hook must not leak outside its group).

Score display after the snippets

The regular score below confirms that none of the snippet settings (staff lines, clef, last-line mode, staff size) leaked into the normal typesetting state.

A
